

## EMPOWERING DATA DRIVEN SOLUTIONS

### Corporate Background

GreenZone Solutions Inc. is a fast-growing woman-owned small business, Small Business Administration-certified 8(a) technology and management consulting firm headquartered in Arlington, Virginia. We provide innovative and dynamic information technology and business solutions to meet our clients' most complex needs. We offer large company capabilities with small company relations to deliver impactful solutions using industry-wide best practices.

Our services have fostered strong and lasting relationships with our clients that continue to grow into further opportunities to provide solutions and support to our federal clients in the ever-evolving information technology environment.

### Core Competencies

#### **Data Management & Analytics**

We support our clients in establishing and maintaining key data management frameworks including capabilities such as big data, data analytics, data governance, data quality, data architecture, metadata, and reference data management.

#### **Agile Software Development**

We deliver sustainable capability using Agile development methodologies and processes in functional and technical requirements analysis efforts and processes.

#### **Cyber Security**

For years we have helped federal agencies and commercial organizations move beyond simply meeting their compliance needs with a focus on intelligent, incremental improvement through strategic investment and process enhancements.

#### **Management Consulting Services**

GreenZone helps clients solve their most complex business challenges through innovative offerings and unique management consulting services to improve performance and operations through efficient solutions and proven methodologies.
